Journal of PHOTOCHEMISTRY AND PHOTOBIOLOGY B:BIOLOGY

Subject Index of Volume 35

Absorbance band
  spectral sensitivity of white-eyed insect mutants in the UV, blue and green, 13
Absorption kinetics
  photoreactions and related charge displacements in the rhodopsin from *Sepia officinalis*, 7
Acrylamide
  fluorescence quenching of the tryptophan emission from the F- and G-forms of actin, 175
Actin
  fluorescence quenching of the tryptophan emission from the F- and G-forms of actin, 175
ADP-Ribosylation
  blue light induced ADP ribosylation of 38 and 56 kDa proteins in the soluble fraction of mycelia of *Neurospora crassa*, 197
ALA
  an apoptotic response to photodynamic therapy with endogenous protoporphyrin in vivo, 209
δ-Aminolevulinic acid
  evaluation of spectral correction techniques for fluorescence measurements on pigmented lesions in vivo, 159
Antibody
  interaction of guanosine 5′-triphosphate binding protein Gq from *Sepia officinalis* with illuminated rhodopsin bound to concanavalin A, 25
Apoptosis
  an apoptotic response to photodynamic therapy with endogenous protoporphyrin in vivo, 209
Arrestin
  calcium/calmodulin-dependent protein kinase II and arrestin phosphorylation in *Limulus* eyes, 33
  kinetic model for phototransduction and G-protein enzyme cascade: understanding quantal bumps during inhibition of CaM-KII or PP2B, 105

Bacteria
  studies on the mechanism of bacteria photosensitization by meso-substituted cationic porphyrins, 149
Blue light
  blue light induced ADP ribosylation of 38 and 56 kDa proteins in the soluble fraction of mycelia of *Neurospora crassa*, 197

Ca^{2+} channel blockers
  pharmacology of a capacitative Ca^{2+} entry in *Xenopus* oocytes, 77
Ca^{2+}-dependent Cl^- current
  pharmacology of a capacitative Ca^{2+} entry in *Xenopus* oocytes, 77
Calcineurin
  kinetic model for phototransduction and G-protein enzyme cascade: understanding quantal bumps during inhibition of CaM-KII or PP2B, 105
Calcium
  latencies of calcium elevation and depolarization in *Limulus* ventral photoreceptors injected with GDP-βS, 91

Elsevier Science S.A.

Calcium-release mechanism
  Limulus ventral photoreceptors contain two functionally dissimilar nositol triphosphate-induced calcium release mechanisms, 97
Calliphora
  isolation of genes encoding photoreceptor-specific proteins by immunoscreening with antibodies directed against purified blowfly rhabdoms, 69
Calmodulin
  calcium/calmodulin-dependent protein kinase II and arrestin phosphorylation in *Limulus* eyes, 33
CaM-KII
  kinetic model for phototransduction and G-protein enzyme cascade: understanding quantal bumps during inhibition of CaM-KII or PP2B, 105
CaM PK II
  calcium/calmodulin-dependent protein kinase II and arrestin phosphorylation in *Limulus* eyes, 33
Ca release
  a quantitative estimate of the maximum amount of light-induced Ca^{2+} release in *Drosophila* photoreceptors, 83
Cephalopods
  rhodopsin, Gq and phospholipase C activation in cephalopod photoreceptors, 19
Cesium-chloride
  fluorescence quenching of the tryptophan emission from the F- and G-forms of actin, 175
Charge displacement
  photoreactions and related charge displacements in the rhodopsin from *Sepia officinalis*, 7
Chenopodium album
  chlorophyll fluorescence quenching, zeaxanthin formation and light scattering in intact leaves of triazine-resistant and triazine-susceptible *Chenopodium album* plants, 189
Circadian
  modulation of function in *Limulus* compound eye photoreceptors by octopamine enantiomers, 59
Con A–sepharose
  interaction of guanosine 5′-triphosphate binding protein Gq from *Sepia officinalis* with illuminated rhodopsin bound to concanavalin A, 25
Confocal microscopy
  latencies of calcium elevation and depolarization in *Limulus* ventral photoreceptors injected with GDP-βS, 91
Current components
  receptor current oscillations evoked by local illumination in *Limulus* ventral nerve photoreceptors, 115

Diphenylisobenzofuran test
  tetraamido-substituted 2,3-naphthalocyanine zinc(II) complexes as phototherapeutic agents: synthesis, comparative photochemical and photobiological studies, 167
Drosophila
  calcium/calmodulin-dependent protein kinase II and arrestin phosphorylation in *Limulus* eyes, 33

isolation of genes encoding photoreceptor-specific proteins by immunoscreening with antibodies directed against purified blowfly rhabdoms, 69
a quantitative estimate of the maximum amount of light-induced Ca^{2+} release in *Drosophila* photoreceptors, 83
Dynamic quenching
fluorescence quenching of the tryptophan emission from the F- and G-forms of actin, 175

Early receptor potential
photoreactions and related charge displacements in the rhodopsin from *Sepia officinalis*, 7
Electron microscopy
tetraamido-substituted 2,3-naphthalocyanine zinc(II) complexes as phototherapeutic agents: synthesis, comparative photochemical and photobiological studies, 167
Electron spin resonance spectroscopy
spin-labeling analysis of structure and dynamics in octopus rhodopsin, 1
ESR spin trapping
photosensitized generation of hydroxyl radical by eight new sulfur and selenium analogs of psoralen, 221

Fluorescence lifetime quenching
fluorescence quenching of the tryptophan emission from the F- and G-forms of actin, 175
Fluorescence quenching
chlorophyll fluorescence quenching, zeaxanthin formation and light scattering in intact leaves of triazine-resistant and triazine-susceptible *Chenopodium album* plants, 189
Fly
light-dependent pigment migration in blowfly photoreceptors studied by in vivo CLSM, 53
Free radical photogeneration
photosensitized generation of hydroxyl radical by eight new sulfur and selenium analogs of psoralen, 221
Furocoumarin analogs
photosensitized generation of hydroxyl radical by eight new sulfur and selenium analogs of psoralen, 221

Gain
modulation of function in *Limulus* compound eye photoreceptors by octopamine enantiomers, 59
G-protein
rhodopsin, Gq and phospholipase C activation in cephalopod photoreceptors, 19
interaction of guanosine 5′-triphosphate binding protein Gq from *Sepia officinalis* with illuminated rhodopsin bound to concanavalin A, 25
Gq
interaction of guanosine 5′-triphosphate binding protein Gq from *Sepia officinalis* with illuminated rhodopsin bound to concanavalin A, 25
Growth
effects of solar radiation on local and German wheat seedlings in a Chilean high mountain station, 181

Heat shock proteins
stress proteins in the cellular response to ultraviolet radiation, 141
Hydrogen photoproduction
sulfide as electron source for H_2-photoproduction in the cyanobacterium *Synechococcus* sp., strain Miami BG 043511, under stress conditions, 203

Inactivation no afterpotential
isolation of genes encoding photoreceptor-specific proteins by immunoscreening with antibodies directed against purified blowfly rhabdoms, 69
Inositol lipid signalling
pharmacology of a capacitative Ca^{2+} entry in *Xenopus* oocytes, 77
Inositol trisphosphate
dawn, diacylglycerol, calcium, and protein kinase C — the retinal wrecking crew. A signal transduction cascade for rhabdom shedding in the *Limulus* eye, 45
Insects visual pigments
spectral sensitivity of white-eyed insect mutants in the UV, blue and green, 13
Invertebrate photoreceptors
dawn, diacylglycerol, calcium, and protein kinase C — the retinal wrecking crew. A signal transduction cascade for rhabdom shedding in the *Limulus* eye, 45
In-vivo fluorescence
evaluation of spectral correction techniques for fluorescence measurements on pigmented lesions in vivo, 159

Lewis lung carcinoma
tetraamido-substituted 2,3-naphthalocyanine zinc(II) complexes as phototherapeutic agents: synthesis, comparative photochemical and photobiological studies, 167
Light control
light-dependent pigment migration in blowfly photoreceptors studied by in vivo CLSM, 53
Light-induced current
a mathematical model for the components of the receptor current in *Limulus* ventral nerve photoreceptors, 123
Limulus
calcium/calmodulin-dependent protein kinase II and arrestin phosphorylation in *Limulus* eyes, 33
Limulus ventral photoreceptors contain two functionally dissimilar inositol triphosphate-induced calcium release mechanisms, 97
kinetic model for phototransduction and G-protein enzyme cascade: understanding quantal bumps during inhibition of CaM-KII or PP2B, 105
Limulus photoreceptor
a mathematical model for the components of the receptor current in *Limulus* ventral nerve photoreceptors, 123
Limulus polyphemus
modulation of function in *Limulus* compound eye photoreceptors by octopamine enantiomers, 59
latencies of calcium elevation and depolarization in *Limulus* ventral photoreceptors injected with GDP-βS, 91
Liposomes
tetraamido-substituted 2,3-naphthalocyanine zinc(II) complexes as phototherapeutic agents: synthesis, comparative photochemical and photobiological studies, 167

Mammalian skin
stress proteins in the cellular response to ultraviolet radiation, 141
Marine unicellular aerobic nitrogen-fixing cyanobacterium
sulfide as electron source for H_2-photoproduction in the cyanobacterium *Synechococcus* sp., strain Miami BG 043511, under stress conditions, 203
Mathematical model
a mathematical model for the components of the receptor current in *Limulus* ventral nerve photoreceptors, 123
Melanoma detection
evaluation of spectral correction techniques for fluorescence measurements on pigmented lesions in vivo, 159
Multiple components
a mathematical model for the components of the receptor current in *Limulus* ventral nerve photoreceptors, 123

Neurospora crassa
blue light induced ADP ribosylation of 38 and 56 kDa proteins in the soluble fraction of mycelia of *Neurospora crassa*, 197

Nicotinamide adenine [^{32}P] dinucleotide ([^{32}P]NAD)
blue light induced ADP ribosylation of 38 and 56 kDa proteins in the soluble fraction of mycelia of *Neurospora crassa*, 197
Nomogram
spectral sensitivity of white-eyed insect mutants in the UV, blue and green, 13

Octopamine
modulation of function in *Limulus* compound eye photoreceptors by octopamine enantiomers, 59

pH block of conductance
pharmacology of a capacitative Ca^{2+} entry in *Xenopus* oocytes, 77
Phospholipase C
rhodopsin, Gq and phospholipase C activation in cephalopod photoreceptors, 19
Phospholipase C pathway
a mathematical model for the components of the receptor current in *Limulus* ventral nerve photoreceptors, 123
Photocrosslinking
photodynamic crosslinking of proteins. II. Photocrosslinking of a model protein–ribonuclease A, 213
Photodynamic therapy
tetraamido-substituted 2,3-naphthalocyanine zinc(II) complexes as phototherapeutic agents: synthesis, comparative photochemical and photobiological studies, 167
an apoptotic response to photodynamic therapy with endogenous protoporphyrin in vivo, 209
Photoinactivation
studies on the mechanism of bacteria photosensitization by meso-substituted cationic porphyrins, 149
Photoprotection
chlorophyll fluorescence quenching, zeaxanthin formation and light scattering in intact leaves of triazine-resistant and triazine-susceptible *Chenopodium album* plants, 189
Photoreceptor
calcium/calmodulin-dependent protein kinase II and arrestin phosphorylation in *Limulus* eyes, 33
latencies of calcium elevation and depolarization in *Limulus* ventral photoreceptors injected with GDP-βS, 91
Photoreceptor membrane turnover
dawn, diacylglycerol, calcium, and protein kinase C — the retinal wrecking crew. A signal transduction cascade for rhabdom shedding in the *Limulus* eye, 45
Photoreceptor potential
modulation of function in *Limulus* compound eye photoreceptors by octopamine enantiomers, 59
Photoreceptors
rhodopsin, Gq and phospholipase C activation in cephalopod photoreceptors, 19
a quantitative estimate of the maximum amount of light-induced Ca^{2+} release in *Drosophila* photoreceptors, 83
Limulus ventral photoreceptors contain two functionally dissimilar inositol triphosphate-induced calcium release mechanisms, 97
Photorespiration
chlorophyll fluorescence quenching, zeaxanthin formation and light scattering in intact leaves of triazine-resistant and triazine-susceptible *Chenopodium album* plants, 189
Photosensitization
studies on the mechanism of bacteria photosensitization by meso-substituted cationic porphyrins, 149
photodynamic crosslinking of proteins. II. Photocrosslinking of a model protein–ribonuclease A, 213
Photosterilization
studies on the mechanism of bacteria photosensitization by meso-substituted cationic porphyrins, 149
Phototransduction
interaction of guanosine 5′-triphosphate binding protein Gq from *Sepia officinalis* with illuminated rhodopsin bound to concanavalin A, 25
calcium/calmodulin-dependent protein kinase II and arrestin phosphorylation in *Limulus* eyes, 33
dawn, diacylglycerol, calcium, and protein kinase C — the retinal wrecking crew. A signal transduction cascade for rhabdom shedding in the *Limulus* eye, 45
isolation of genes encoding photoreceptor-specific proteins by immunoscreening with antibodies directed against purified blowfly rhabdoms, 69
kinetic model for phototransduction and G-protein enzyme cascade: understanding quantal bumps during inhibition of CaM-KII or PP2B, 105
Porphyrins
studies on the mechanism of bacteria photosensitization by meso-substituted cationic porphyrins, 149
Protein kinase
calcium/calmodulin-dependent protein kinase II and arrestin phosphorylation in *Limulus* eyes, 33
Protoporphyrin
an apoptotic response to photodynamic therapy with endogenous protoporphyrin in vivo, 209
Protoporphyrin IX
evaluation of spectral correction techniques for fluorescence measurements on pigmented lesions in vivo, 159
Pupil mechanism
light-dependent pigment migration in blowfly photoreceptors studied by in vivo CLSM, 53

Receptor current bursts
receptor current oscillations evoked by local illumination in *Limulus* ventral nerve photoreceptors, 115
Retina
calcium/calmodulin-dependent protein kinase II and arrestin phosphorylation in *Limulus* eyes, 33
dawn, diacylglycerol, calcium, and protein kinase C — the retinal wrecking crew. A signal transduction cascade for rhabdom shedding in the *Limulus* eye, 45
isolation of genes encoding photoreceptor-specific proteins by immunoscreening with antibodies directed against purified blowfly rhabdoms, 69
Rhodopsin
spin-labeling analysis of structure and dynamics in octopus rhodopsin, 1
photoreactions and related charge displacements in the rhodopsin from *Sepia officinalis*, 7
rhodopsin, Gq and phospholipase C activation in cephalopod photoreceptors, 19
interaction of guanosine 5′-triphosphate binding protein Gq from *Sepia officinalis* with illuminated rhodopsin bound to concanavalin A, 25
Ribonuclease A
photodynamic crosslinking of proteins. II. Photocrosslinking of a model protein–ribonuclease A, 213

Screening pigments
effects of solar radiation on local and German wheat seedlings in a Chilean high mountain station, 181
Second messengers
dawn, diacylglycerol, calcium, and protein kinase C — the retinal wrecking crew. A signal transduction cascade for rhabdom shedding in the *Limulus* eye, 45
Sepia officinalis
interaction of guanosine 5′-triphosphate binding protein Gq from *Sepia officinalis* with illuminated rhodopsin bound to concanavalin A, 25

Single photon response
receptor current oscillations evoked by local illumination in *Limulus* ventral nerve photoreceptors, 115
Solar ultraviolet radiation
effects of solar radiation on local and German wheat seedlings in a Chilean high mountain station, 181
Spectral sensitivity
spectral sensitivity of white-eyed insect mutants in the UV, blue and green, 13
Spectroscopy
evaluation of spectral correction techniques for fluorescence measurements on pigmented lesions in vivo, 159
Spin labeling
spin-labeling analysis of structure and dynamics in octopus rhodopsin, 1
Spot illumination
receptor current oscillations evoked by local illumination in *Limulus* ventral nerve photoreceptors, 115
Sulphide as electron source
sulfide as electron source for H_2-photoproduction in the cyanobacterium *Synechococcus* sp., strain Miami BG 043511, under stress conditions, 203
Synechococcus sp.
sulfide as electron source for H_2-photoproduction in the cyanobacterium *Synechococcus* sp., strain Miami BG 043511, under stress conditions, 203

Tetraamido-substituted naphthalocyanine zinc(II) complexes
tetraamido-substituted 2,3-naphthalocyanine zinc(II) complexes as phototherapeutic agents: synthesis, comparative photochemical and photobiological studies, 167
Thermotolerance
stress proteins in the cellular response to ultraviolet radiation, 141
Transduction
latencies of calcium elevation and depolarization in *Limulus* ventral photoreceptors injected with GDP-βS, 91
Transduction pathways
receptor current oscillations evoked by local illumination in *Limulus* ventral nerve photoreceptors, 115
Transient receptor potential
isolation of genes encoding photoreceptor-specific proteins by immunoscreening with antibodies directed against purified blowfly rhabdoms, 69
Triazine resistance
chlorophyll fluorescence quenching, zeaxanthin formation and light scattering in intact leaves of triazine-resistant and triazine-susceptible *Chenopodium album* plants, 189
Triticum aestivum
effects of solar radiation on local and German wheat seedlings in a Chilean high mountain station, 181

UV radiation
stress proteins in the cellular response to ultraviolet radiation, 141

Vision
light-dependent pigment migration in blowfly photoreceptors studied by in vivo CLSM, 53

Wheat
effects of solar radiation on local and German wheat seedlings in a Chilean high mountain station, 181
White eye
spectral sensitivity of white-eyed insect mutants in the UV, blue and green, 13

Xanthophyll cycle
chlorophyll fluorescence quenching, zeaxanthin formation and light scattering in intact leaves of triazine-resistant and triazine-susceptible *Chenopodium album* plants, 189
